

STAY SMARTER KEEP CONNECTED

OIL AND GAS

Scientel Solutions offers reliable and secure telecommunication solutions no matter where you are in the world. We can design, implement and support communication and video networks wherever you need us, including remote locations, rough terrain and in extreme outdoor conditions.

Scientel specializes in custom designed technology solutions engineered to solve the exact challenges at hand. We can leverage leading-edge Internet of Things and Industrial Internet of Things technology to smoothly transition your existing infrastructure into a smart system that connects the dots to increase efficiency, safety, and profitability.

20%

McKinsey & Company finds that the effective use of digital technologies in the oil and gas sector could reduce capital expenditures by up to 20 percent

\$1B

Better use of existing technology can deliver up to \$1 billion in cost savings or production increases.

10K

Smart grids assess resource usage and network performance in real time using more than 10,000 sensors

STAY SMARTER AND KEEP COMPETITIVE

- **Multiple Address Radio (MAS)** and **Supervisory Control and Data Acquisition (SCADA)** for superlative pipeline monitoring
- **Asset Tracking** and geolocation services ensure that equipment is properly utilized to maximize efficiency and profit
- **Remote Monitoring** with real-time data to improve spot market and long term trend analysis and minimize shut downs
- **Video Network Solutions** improve visibility for field operations while recording and storing critical video footage
- **Automated Meter Readings (AMR)** measure the flow of liquids and gasses in every phase of exploration, production and transportation
- **Data Security** solutions protect proprietary data to the same security standard as government
- **Quick Deploy Positioners** can rapidly deploy broadband communication networks in oil fields needing to relocate well-head
